

A 20x20 heatmap visualization of the MNIST dataset. The image displays a grid of 400 small squares, each representing a pixel of a handwritten digit. The color scale ranges from dark red (low intensity) to light orange (high intensity). The digits are arranged in a 4x5 grid, with each digit occupying a 4x4 sub-region of the overall grid. The digits are rendered in a dark red color against a lighter red background, with a grid of small squares representing individual pixels.
